HOSPITALITY SERVICES

Rentokil

The Experts in Pest Control

Protecting your guest experience: Hotels & Resorts

Meeting guest expectations and safeguarding your reputation

The hotel and resort industry

We understand hoteliers have many competing demands to deliver exceptional services and facilities. Ensuring your Guests' experience is of critical importance as negative reviews will affect the hotel's reputation.

Multiple entrances, kitchen areas and bedrooms make hotels an attractive target for different types of pests, and there is also the risk of pests entering via stock delivery from various suppliers.

With reputations at stake, it is important to work with credible supply chain partners to help manage your food safety and regulatory compliance risks.

Potential impact of pest infestation

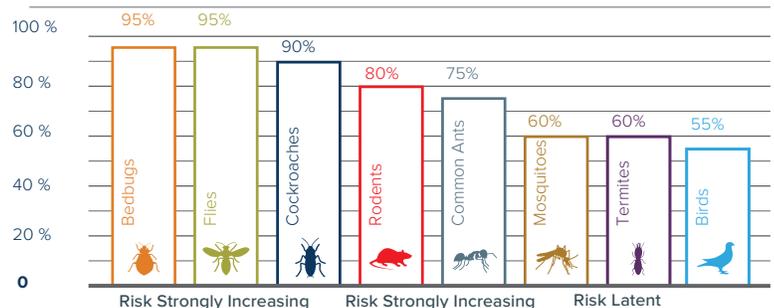

- Long-lasting damage to image and reputation
- Low occupancy and loss of customers
- Loss of revenue
- Compensation claims from disgruntled guests
- Damage to employee relations

Helping you to comply audit requirements

At Rentokil, we emphasise on the importance of partnership for a successful integrated pest management (IPM). Rentokil's team of experts will work with you on our programme that is benchmarked against the most stringent standards or certification.

- ISO 9001:2008
- ISO 22000:2005
- Corporate audits
- Good Manufacturing Practice (GMP)

Risk of Pest Infestation in the Hotel and Resorts Industry

Source: Rentokil Pest Control

Solutions and services for protection against pest

Bird Control

Rentokil offers versatile bird control solutions to suit your premises. These include bird netting and bird point deterrents that are discreet and effective to keep pest birds away

Termite Control

Rentokil has different solutions for termite control to suit your needs including full termite inspection, baiting method and termiticide treatment

Rodent Control

Rentokil will provide proactive recommendation to seal potential entry points, deploy bait stations and glue traps at strategic locations for rodent control

Cockroach Control

Rentokil provides cockroach control with insecticide application, combined with gel bait and glue traps to detect severity of infestation

Mosquito Control

Rentokil provides a thorough inspection for any potential breeding grounds and treats them with larvicide. Thermal fogging treatment will also be carried out to eliminate harbouring and breeding adult mosquitoes surrounding your premises

Ant Control

Rentokil ant control uses insecticide application or gel bait application at targeted areas in your premises to proactively minimise the chance of a serious infestation

Flying insects Control

Flying insects are controlled with Rentokil Insect Light Traps which eliminate the risk of contamination from fly body fragments by using a patented adhesive technology to hygienically trap flies

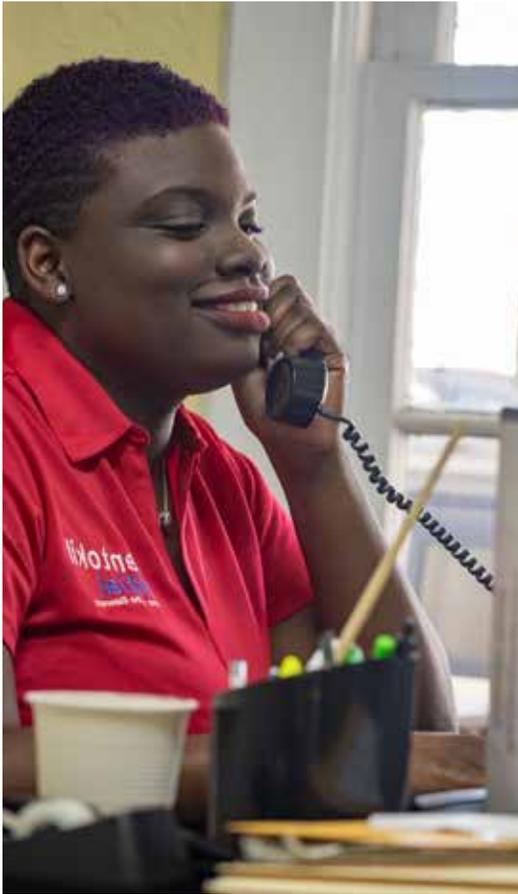

Bed Bug Control

Rentokil recommends a specially designed intensive bedbug treatment to remove and help prevent the spread of an infestation effectively

Integrated Pest Management (IPM)
